

## 25<sup>th</sup> Annual Brisbane Miniature Train Show: May 2-4 2002

Here are some highlights from my first time at Brisbane's annual train show... overall good but for all the large number of exhibitors there wasn't a lot of either cane or 009/7mm models.

One of Tom Badger's (*Tom's Tractors*) tractors with a single bin trailer. He also had a variety of locos, bins, and other cane models.

Brian Hutcheson's (*Trackside Trees*) realistic Aussie trees using foliage mat.

Two views on the 7mm(On30) cane railway from Jim Fainges, Steve Malone and colleagues, the only exclusively cane railway at the show.

Coming soon from *Chivers Finelines* in On30. I bought one of their round top bogie wagon kits.

Steve Malone's coal-fired 16mm scale (32 mm gauge) Fowler model. Not shown: a garden railway with a small diesel pulling whole stick trucks and a small HOn30 cane operation as part of a larger HO layout.
