

INNISFAIL TRAMWAYS

GUARDS VAN Class "HB" Conversion

using a HANOVALE MODELS
Innisfail tramway "H" wagon kit

HB Conversion general notes :-

Using a Hanovale H wagon as a base make the under frame as standard cut and modify sides as shown.

Cut parts for sides and ends of guards compartment from plastic and assemble into a box and glue to center of floor.

Bend a piece of 30 thou plastic for the roof and cover with corrugated metal.

Bend wire for handrails and fit.

The bogies should have brake hangers but this is optional.

Side steps are simply 2 strips of plastic and can be mounted on wire supports.

These are general notes for more experienced modelers there are many other methods that can be used to advantage for other ideas consult the plan.
