

M.R.Q.C. 2012 - Reference list of magazine articles, books and other sources for rail, model rail and related subjects in Queensland

- Compiled by Ian Childs -

1. Australian Model Railway Magazine. Rail operations, prototype articles, modelling articles, photographs etc. which have appeared in A.M.R.M. since May 1963 are listed on pages 3 to 7. Back issues are still available in print form (1981 on). Early issues are now also available on C.D. with 12 issues on each C.D. At the time of compiling this list (April 2012) Issues 1 to 129 (11 C.D's.) were available. A.M.R.M. has been a long time supporter of this convention and the availability of this material is certainly of assistance for all modellers.

2. Australian Railway Historical Society. Another good source of information: "Bulletin" articles on Queensland subjects have appeared over many issues. These are also available on C.D. (10 years per C.D) through their N.S.W. sales centre. There have also been many publications on Queensland subjects by the Qld. Division. Some of these are still available from the A.R.H.S. and various retail and second hand outlets. (Train & model shows).

3. A.R.H.S. Qld. Division. "Sunshine Express" magazine dealing with various Queensland subjects. Probably harder to find back issues, the Qld. Division may be able to assist.

4. Eveleigh Press Publications. (S.C.R.Publications/Australian Model Railway Magazine). Australian Diesel Scene #3, "The Wallangarra Goods", #4 "Kevin's Night of Drama" (Moreton Mill Story) and #5 "Sarina and Environs". Qld. The Blue and White era. Photographic coverage of Qld. Railways diesel loco's.

5. Train Hobby Publications. "Railway Stations in Queensland (Country and Greater Metropolitan Brisbane, 2 volumes) and "Country Railways of Queensland" (part one). Full colour photographic coverage of stations, and trains in Queensland. Plenty of detail and ideas for modelling. Available from various outlets.

6. A.M.R.A. Qld. " Railways of Queensland" volumes 1 to 6. Photographic coverage, both black and white and colour of Queensland rail subjects. Some copies still available from A.M.R.A. and other outlets.

7. Light Railways. (Light Railway Research Society of Australia). As well as current Qld. Cane line operations, articles on Queensland railway and tramway subjects appear from time to time. They also have a good selection of Queensland publications from their sales section.

8. Narrow Gauge Down Under. Freelance and prototype modelling articles with an emphasis on Tramway and other narrow gauge modelling.

9. Branchline Modeller/Aust.Journal of Railway Modelling. Two useful articles for HOn 3 ½ modellers. Issue #3, "A Narrow Gauge Loco Mechanism" (AR 45 class bogies

modified) and Issue #8 "Narrowing Athearn SD-9 bogies to 3' 6" gauge). This publication also had plenty of other useful modelling articles. (Some issues still available from Gwydir Valley Models ?)

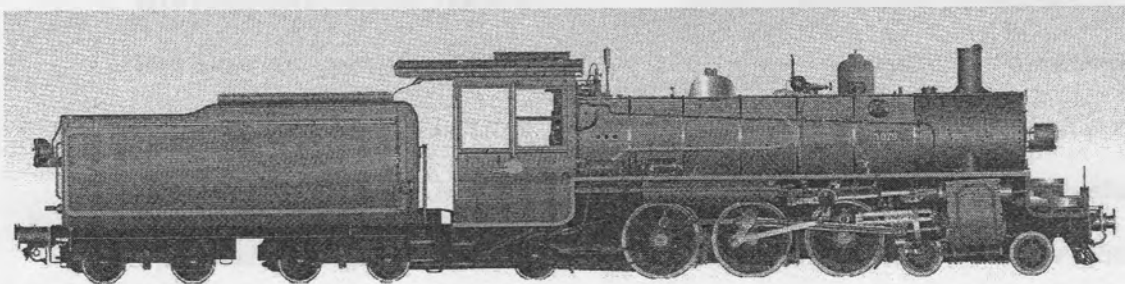

10. Australian Sn Modeller. Specialist magazine catering for "S" (1:64) Modellers of narrow gauge Australian modelling. Available by subscription only, (refer page 7 for contact details)

11. Australian Narrow Gauge Railway Museum Society. Books, CD's and models available from their operating museum at Woodford, train shows and on line. (See web listing page 7.)

12. John Armstrong's convention books. "Modelling the Qld .Railways Scene"(2004). "Wooden Wagons of Q.R. 1880-1980"(2006). "Iron & Steel Wagons, Q.R.Steam Era"(2008). "Wooden Carriages of Q.R."(2010). Very limited print runs, a lot of useful information for modellers of the Queensland scene if you are lucky to obtain copies.

13. Lynn Zelmer's Rail Heritage/Modelling etc. Web site managed by Lynn Zelmer covering rail heritage and rail/tram modelling sites (refer web listing, page 7).

14. Previous Convention booklets. Collection of presenters notes from each convention. If you can find copies they are worth acquiring/keeping.
